**The National Benefits Beyond Mississippi**

International students studying at U.S. colleges and universities contribute $36.9 billion and support 450,331 jobs to the U.S. economy.* For every seven international students enrolled, three U.S. jobs are created and supported by spending occurring in the higher education, accommodation, dining, retail, transportation, telecommunications and health insurance sectors.

The economic contributions of international students are in addition to the immeasurable academic and cultural value these students bring to our campuses and local communities.
